

ABSTRACT OF THE DISCLOSURE

Disclosed is an article-dropping proof pocket for garments which is capable of preventing small articles from spring out and falling down from the pocket even if a person wearing the garment
5 bends downward or moves quickly. It comprises a piece of seal cloth fixed to the front or rear side of the garment cloth in the inside of and in the vicinity of the upper edge of the small flat cloth for closing the opening of the upper edge of the small flat cloth, and fastening means for detachably fastening the piece of seal cloth to the small flat cloth.
